IITPSA Accreditation: A Milestone for Excellence

Regenesys Education is accredited by the Institute of Information Technology Professionals South Africa (IITPSA).

Established in 1957, IITPSA is South Africa's leading professional body- committed to growth of ICT Professionals and ensuring IT courses are high-quality, job-ready, and meet industry standards.

Why Is IITPSA Accreditation Important?

IITPSA accreditation is a hallmark of quality, affirming that Regenesys Education meets the highest standards in curriculum design, faculty expertise, and industry alignment.

It ensures our courses are recognised locally and internationally, providing our students with a competitive edge in the job market.

What are CPD Points?

CPD, or "Continuous Professional Development" refers to structured learning activities aimed at improving professional knowledge, skills, and competencies.

Purpose:

- To ensure professionals stay updated with the latest trends, tools, and best practices in their field.
- To maintain and enhance professional standards and career development.

Our IITPSA-accredited courses provide CPD opportunities, helping professionals meet annual requirements to maintain industry body memberships while enhancing their expertise.

About The Course

Artificial Intelligence is reshaping how we live and work, from self-driving cars to virtual assistants. To help you thrive in this field, Digital Regenesys offers the Artificial Intelligence Course - a 24-week immersive journey covering machine learning, neural networks, NLP, and AI ethics.

Gain hands-on experience with cutting-edge AI tools and real-world case studies, equipping you to develop AI-driven solutions and drive innovation. Whether you are an aspiring AI enthusiast or a professional looking to upskill, this course provides a strong foundation in AI concepts and applications.

Join us and take the next step towards becoming an AI expert.

Who is This Course For

After Completion of The Course

Set up an AI development environment and build a strong programming foundation with logic, data structures, and control flow.

Develop proficiency in Programming for AI-driven tasks by applying modular programming, automation and data handling techniques.

Master AI model development for regression tasks and apply advanced analytical techniques to convert raw data into meaningful features.

Gain hands-on experience in supervised and unsupervised learning, apply model evaluation, and deploy AI solutions for real-world decisions.

Design and implement neural networks, using CNNs for vision and RNNs for sequential data in AI applications.

Develop AI models for Natural Language Processing and Computer Vision with preprocessing, classification, and real-world applications.

Curriculum Overview

Module 1

Programming Foundations for AI

Ability to set up an AI development environment, Skills in implementing mathematical operations and computational logic, Understanding of data structures for AI applications

Duration: 16 hours (4 weeks)

Module 2

Applied Programming for AI

Ability to apply modular programming for AI tasks, Proficiency in automating processes and handling data efficiently

Duration: 16 hours (4 weeks)

Predictive Modeling with Regression

Understanding of AI-based regression techniques, Skills in feature engineering and data transformation for AI applications

Duration: 16 hours (4 weeks)

Predictive Modeling with Classification & Clustering Techniques

Hands-on expertise in supervised and unsupervised learning methods, Ability to evaluate and optimise AI models, Proficiency in deploying AI solutions for intelligent decision-making

Duration: 16 hours (4 weeks)

Deep Learning & Neural Architectures

Ability to design and implement neural networks, Expertise in CNNs for computer vision and RNNs for sequential data processing

Duration: 16 hours (4 weeks)

Natural Language Processing & Computer Vision

Proficiency in text and image preprocessing techniques and skills in applying AI models for real-world applications.

Duration: 16 hours (4 weeks)

Self-Paced Modules

Master cutting-edge AI applications through hands-on, pre-recorded sessions that equip you with real-world skills in NLP, Computer Vision, and Time Series Analysis.

Applied Natural Language Processing

Build intelligent text-based systems using state-of-the-art NLP tools.

- Hugging Face Pipelines for Quick NLP Deployment
- Automated Text Summarization Techniques
- Building NLP-Driven Recommendation Engines

Applied Computer Vision

Harness the power of AI to analyze and understand visual data.

- Real-Time Object Detection Techniques
- Intelligent Video Stream Object Tracking
- Human Pose Estimation & Behavioral Insights

Applied Time Series Analysis

Predict trends and make data-driven decisions using time series forecasting.

- Time Series Data Basics & Manipulation with Pandas
- Statistical Models: ARIMA, SARIMA
- Deep Learning for Time Series Forecasting (LSTM, GRU)
-

Key Highlights

Hands-on
experience with
industry standard
tools

Practical
assignments
and real-world
projects

Certificate upon

completion

Expert-led
training with
interactive
sessions

Career Opportunities

From our AI course, participants can explore exciting roles such as:

- Machine Learning Engineer
- AI Research Scientist
- AI Engineer
- Computer Vision Engineer
- AI Product Manager
- AI Consultant

Work Readiness

Work Readiness at Digital Regenesys empowers learners with critical soft skills, emotional intelligence, stress management, and mindfulness, fostering resilience and adaptability to meet evolving professional demands. By bridging the gap between academic learning and workplace expectations, it prepares learners for success in the workplace. Practical components like resume building and LinkedIn profile optimisation complement this approach, ensuring learners are equipped for real-world challenges.

Foundations of Work Readiness

Unit 1 : Introduction to Soft Skills

Unit 2 : Communication Skills

Unit 3 : Resume Crafting and Digital Presence

Level 01

Advanced Work Readiness (Practical-Oriented)

Unit 1 : Advanced Soft Skills

Unit 2 : Emotional Intelligence

Unit 3 : Stress Management

Unit 4 : Mindfulness

Level 02

Industry Expert Sessions

At Digital Regenesys, we bring learning to life with exclusive Industry Expert Sessions integrated into every course. These sessions not only connect students with seasoned professionals who share real-world insights, emerging trends, and practical knowledge but also foster personal growth. Through interactive Q&A discussions, learners gain clarity, enhance their decision-making skills, and develop a deeper understanding of their career paths, ensuring they are both industry-aligned and future-ready.

Work Readiness Programme Benefits

- ✓ **Develop Critical Skills:**
Gain soft skills like collaboration, adaptability, and conflict resolution.
- ✓ **Communicate Confidently:**
Improve verbal, non-verbal, and digital communication for professional interactions.
- ✓ **Build Your Professional Identity:**
Create impactful resumes, optimise LinkedIn profiles, and manage your online presence.
- ✓ **Learn from Experts:**
Gain real-world insights, emerging trends, and practical strategies from seasoned professionals.
- ✓ **Prepare for Success:**
Tackle workplace challenges confidently and align with future career opportunities.
